Magellan Hill Expands Healthcare Presence with St. Mary's Medical Center

HADDONFIELD, N.J. – Magellan Hill Technologies, LLC, a telecommunications management and consulting company based in Haddonfield, N.J., said Monday that it has contracted with St. Mary's Medical Center to provide voice and data services to its Langhorne, Pa. campus.

Founder and CEO Brad Bono said St. Mary's agreement represents the type of deal on which Magellan is focusing in 2011 — large strategic partners who look to Magellan to manage their voice and data needs.

"We are delighted to add St. Mary's to our growing portfolio of healthcare companies, which includes Our Lady of Lourdes Medical Center, as well as numerous smaller healthcare centers and providers," Bono said. "Our growth in the healthcare space is testament to the type of network reliability and customer service we provide our customers. Healthcare providers need communications management which focuses on their needs — reliability, intense customer service and attractive pricing. We are pleased to bring that to St. Mary's."

St. Mary's Medical Center is part of Catholic Health East, a multi-institutional Catholic Health system that provides 34 acute care hospitals and other free-standing and hospital-based care facilities across 11 eastern states.

About Magellan Hill Technologies

Magellan Hill Technologies offers a wide range of communications and technology solutions for mid-sized and enterprise business customers, including telecommunications management, internet services, and local and long-distance phone service. Headquartered in Haddonfield, N.J., Magellan Hill also offers an innovative approach to charitable giving through its U Care Now division, which provides phone and Internet service to residential customers.
